ABOUT COMPANY

METAL HARVEST SA

Metal Harvest SA (Pty) Ltd is a registered South African private company operating within the metals, materials handling, and industrial support sector. The company is officially registered with the Companies and Intellectual Property Commission (CIPC) under Registration Number 2023/682326/07, with its principal place of business located in Mahlakwena Village, Stand No. 267, Steelpoort, Limpopo, 1133.

Established in April 2023, Metal Harvest SA was founded with a clear vision: to transform scrap and industrial waste into valuable economic resources while supporting the mining, smelting, construction, and industrial sectors with reliable materials handling solutions. The company's slogan, "Giving Life To Scrap," reflects its commitment to sustainability, circular economy principles, and value creation within the metals industry.

VISION

Operating in the heart of Limpopo's industrial and mining corridor, Metal Harvest SA strategically positions itself to serve mining houses, smelters, construction companies, engineering firms, and manufacturing plants across South Africa. To become a leading materials handling and scrap recovery partner in South Africa, recognized for operational excellence, reliability, sustainability, and customer-centered solutions.

MISSION

- To provide professional materials handling services that enhance operational efficiency in industrial environments.
- To recover, process, and trade scrap materials responsibly and sustainably.
- To build long-term partnerships with clients through quality service delivery.
- To contribute to environmental sustainability through responsible recycling practices.

COMMITMENT TO SUSTAINABILITY

Metal Harvest SA operates within a sustainability-driven framework. Recycling scrap metal significantly reduces:

- Energy consumption compared to primary metal production
- Mining of virgin raw materials
- Carbon emissions
- Industrial waste

VALUES

HEALTH, SAFETY & ENVIRONMENTAL COMPLIANCE

Operating in industrial and mining environments requires strict compliance with safety regulations. Metal Harvest SA is committed to:

- Adhering to occupational health and safety standards
- Providing trained personnel
- Ensuring safe materials handling practices
- Environmental compliance in scrap processing
- Maintaining clean and organized work environments

SERVICES

IDLERS

Supply of various types of conveyor idlers, Installation services, Maintenance and replacement, Heavy-duty idlers for high-impact areas

BELTS

Supply of industrial conveyor belts, Belt installation services, Belt maintenance and replacement, Belt alignment and tensioning services

CONVEYORS

Conveyor system supply, Installation and commissioning, Maintenance and repairs, Upgrades and retrofitting

BEARINGS BUSHINGS, WHEELS

Heavy-duty bearings for conveyor systems, Industrial bushings for rotating machinery, Steel wheels for material transport systems, Gear assemblies for smelting and mining equipment.

STACKER RECLAIMERS

Mechanical component supply, Maintenance support, Spare parts provision, Performance optimization

FLUID HANDLING

Supply of fluid transfer systems, Pump-related support, Industrial lubrication systems, Maintenance of fluid systems

SCRAPERS SPILAGE CONTROL

Conveyor belt scrapers, Primary and secondary cleaning systems, Spillage management solutions, Custom scraper installations

SCRAP METAL PROC.

Industrial plants, Mining operations, Construction sites, Demolition projects, Manufacturing facilities. Types of scrap include:

Ferrous scrap (steel, cast iron)

SCRAP SUPPLY

The company supplies scrap materials to:

Foundries
Recycling plants
Manufacturing operations

SCRAP PROCESSING

Sorting
Cutting and resizing
Removal of contaminants
Bulk preparation for smelting

PULLEYS

- Drive pulleys
- Tail pulleys
- Snub pulleys
- Bend pulleys

OPERATION STRATEGY

Metal Harvest SA's operational strategy focuses on:

- Reliability
- Rapid response time
- Competitive pricing
- Quality assurance
- Long-term partnerships

TARGET MARKET

Metal Harvest SA serves:

- Mining companies
- Smelting operations
- Foundries
- Construction companies
- Engineering firms
- Manufacturing plants
- Recycling facilities

COMMUNITY AND ECONOMIC IMPACT

Metal Harvest SA contributes to local economic development by:

Creating employment opportunities

Supporting local suppliers

Promoting recycling awareness

Contributing to industrial sustainability

The company recognizes the importance of community involvement and responsible corporate citizenship.
